DAS and social responsibility...this is going to have a new chapter for the company as our cooperation with the Dresden secondary school *Bürgerwiese* will come to the next level.

The students are especially involved in environmental projects and participate in the international project „Plant for the Planet“. Part of this project involves the planting of trees to improve the local environment and to contribute to the reduction of global CO2 emission. DAS will support this project financially and donate 1,000 trees for Dresden and the world.
