FedEx Supports Plant
Internet 3/10/2011
By Kurt Daniels

FedEx has offered support for the 'Plant-for-the-Planet' initiative launched by students in Germany.

Under this project, students of Rhein-Sieg District in Germany will plant about 100,000 trees over the next three years in the region to raise environmental awareness among students.

FedEx has agreed to support the initiative through event planning and has also donated \$40,000 to support the program.

Bernhard Schloemer, managing director, Operations, Central and Eastern Europe at **FedEx** Express said, "It is really impressive to see how youths around the world have responded to the Plant-for-the-Planet initiative and are committed to raising awareness of environmental issues. **FedEx** is proud to be a part of this unique initiative and help plant more than 100,000 trees."
